INJECTIONS

MINIMALLY INVASIVE SPINE
PROCEDURES FOR PAIN

When you CALL OR FAX Pinkerton Pain Therapy for an appointment for your patient or your patient calls, we will contact the patient within hours to arrange an appointment as soon as possible to help take care of their pain.

Tracy or Tosha will be in contact with your patient to speak with them about their pain and arrange for the most appropriate action in conjunction with me.

My goal is to use whatever it takes to make your patient comfortable so that they can exercise and increase endorphins which are much more effective than any oral opioid.

PHONE: 913-981-0830

FAX: 913-981-0831

Our practice is about getting people
back to activities of life, work and
family as a result of our
INTERVENTIONS.

Pinkerton Pain Therapy was founded in Joplin Missouri in 2005 with the vision to provide the best interventional pain management in the Four state area around Joplin. That vision was transplanted to the Kansas City area in 2011 after the Joplin tornado.

Since 2011 Dr Pinkerton has established Pinkerton Pain Therapy in the Kansas City area and has maintained that same vision for excellence.

In a national environment in which Obamacare has rewarded the bigger players with the most lobbying power giving hospitals and insurance companies the upper hand over physicians, Pinkerton Pain Therapy has kept its overhead low in order to continue to be available for patients. Hospitals have historically not been very good at making care less expensive or more accessible for patients. After all, why would a doctor want to see more patients after 4 PM? The hospital staff goes home at 3:30 PM and the doctor gets paid the same regardless of the number of patients seen.

Tracy, Tosha and Dr. Pinkerton are always available to take your calls until 6 PM, if not, you can always fax your consult to our secure UPDOX fax and we will check it early the next day.
