

PRACTICE SPOTLIGHT: SEPTEMBER 2018

SOMERS EYE CENTER

Ophthalmology:

Dr. Somers is a graduate from Brown University and completed his Residency at Yale, where he was Chief Resident in his final year.

Dr. Somers has been in his current practice since 2001. He is very compassionate about what he does, and truly wants what is best for the patient.

We moved to a complete new office in 2015. We are located in the North Kansas City Hospital in the Pavilion part, on the 12th floor.

If you ask the technicians that work with him, what they admire about Dr. Somers is that he gives the patients their choices of treatment, and lets them decide what they want to do. He will offer what he believes to be best, but will not force any patient into surgery or any other treatment without them being on board with it.

We have a full service practice from basic eye exams, specialty eye exams, cataract surgery, laser surgery, PRK, foreign body removal, disability exams, to vast variety of glasses and contacts.

We appreciate any referrals and will make sure to get patients into our office in a timely manner, and get the results of their visit, back to you in as soon as possible.

DR. SOMERS WAS VOTED:

ONE OF THE TOP DOCTORS AS CHOSEN BY THEIR PEERS

THIS WAS FEATURED IN 435 MAGAZINES

OUR QUOTE:

OUR FOCUS IS ON YOUR VISION

We strive to be the best we can be, and to provide the patients with a pleasant experience that will make them want to come back.
