

PRACTICE SPOTLIGHT : APRIL 2021

NEW FRONTIER MOBILE DIAGNOSTICS

Practice Specialty: In-Office Diagnostic Imaging

- Increase Compliance
- Decrease Costs
- Gain Valuable Insights and Consults

Why send patients away when you can get quality imaging in the convenience of your practice?

New Frontier's professional technologists use portable, hospital-grade technology to provide diagnostic imaging for a wide range of conditions including heart disease, stroke, diabetes, vascular conditions, and more.

Increase Compliance

Patients are **34% more likely to comply** with imaging orders in their primary practice, according to the NIH. A known procedure location, familiar setting, and transportation requirements make in-office imaging ideal for patients.

Decrease Patient Costs

In-Office Imaging from NFMD is **30% less expensive**, according to FMV assessments, and **referrals to secondary care drop 52%**, lowering their medical costs, and possibly improving bonus calculations.

Better Reports, Better Consults

NFMD partnered with Healignt Physicians Group and KC Pediatric Cardiology, aligning imaging protocols, quality measures, and communication to produce thorough interpretations and direct physician consultations.
