

PRACTICE SPOTLIGHT: AUGUST 2014

PRIORITY

Specialties

WE ARE A MEDICAL TEAM WITH A FOCUS IN 4 SPECIALIZED AREAS WITH THE PRIMARY GOAL OF TOTAL WELL BEING FOR OUR PATIENTS, AND YOURS. OUR FOCUS AREAS INCLUDE LACTATION, NUTRITION, ASTHMA, AND PSYCHOLOGY.

Lactation: Our lactation program is staffed by lactation consultants who are board certified by the IBCLC and have over 40 years of combined experience working with mothers and their babies. Our primary goal is to protect, promote, and support breastfeeding. We offer appointments both in our office and in your home.

Psychology: Dr. Brown has over 28 years of experience working with clients of all ages. His services include counseling, group therapy, psychological testing, hypnosis, and classes. Dr. Brown has administered psychotherapy for issues ranging from depression to life adjustments due to divorce and job loss, as well as many more. According to research, our interdisciplinary approach to mental health care is the most effective form of care.

Nutrition: We are pleased to offer nutrition services to both our patients, and yours, by a registered dietitian. Our dietitian is available to see children and adults to discuss topics such as weight loss, weight gain, picky eating, sports nutrition, and many more. We are in the process of fine tuning our medically managed weight management program to help families improve overall health and quality of life. We also provide health screenings to let families learn about their risk factors and take control of their health.

Asthma: Our asthma program is headed up by a Certified Pediatric Nurse Practitioner whose main focus is the treatment of asthma. The goal of our asthma management program is to provide a plan of care that is individualized and greatly minimizes interruptions in the lives of our families due to need for urgent care visit, hospitalization, or visit to the doctor due to severe asthma exacerbations

We greatly appreciate referrals from outside health providers. Our goal is to offer services in our areas of specialization that other providers may not have access to. We take special care to designate patients from outside providers and communicate all findings and recommendations to the referring provider via phone, letter, or faxing of medical records.
