

## PRACTICE SPOTLIGHT: MARCH 2018

### PAIN SOURCE SOLUTIONS

#### Practice Specialty: Pain Management

Successful treatment of a chronic pain or neurological condition begins with expanding your knowledge and exploring your options.

Welcome to *Pain Source Solutions*, where our innovative techniques are advancing treatment standards for chronic pain and disorders causing pain. Forty-five percent (45%) of Americans will have acute or chronic pain at any given time so, our role is to broaden treatment choices for patients and physicians who treat them. In turn, life gets better.

As the premier pain-management practice in Kansas/Missouri, we offer the most diverse array of treatment options in the area. These include both traditional medical therapies and innovative advanced interventional techniques. *Pain Source Solution's* staff is comprised of board-certified medical specialists in Anesthesiology and Pain Management.

Our physicians have years of experience treating many different types of pain. When appropriate the providers will use other health care team members to manage individualized situations. Some of the other team members may include case managers, rehabilitation nurses, occupational and physical therapists, exercise physiologists, dieticians and family counselors who develop a comprehensive plan tailored for each patient.

Dr. Pat Griffith

Dr. Sean Clinefelter

Because the first step in treating pain is making an accurate diagnosis, Pain Source Solutions requires a referral from a medical provider (family physician, surgeon, nurse practitioner, chiropractor) who is familiar with your pain condition. That way, we can get the results of any medical tests that have already been done or any treatment you may have already had.
